MEDIUM	1000	350	100	350	125	260	115

APPLICATIONS

In many applications removal of unwanted particles from the product stream is required prior to the final packaging process.

The fines removal tray allows smaller product particles to fall through carefully sized screens, separating the oversized from the undersized.

Depending on the design of this tray it is possible to screen either undersized or oversized particles for collection/removal.

Note: Information presented may be updated without notification. Please consult Enmin if exact dimensions are required
